

Stormwater Basics Workshop

*A workshop on basic elements of proper
stormwater management on construction sites*

December 1, 2009

Sumter, SC

When: Morning/Afternoon Sessions, Tuesday, December 1, 2009

Where: Training Center, 1281 North Main Street, Sumter, SC (adjacent to the Sumter County Public works office). Signs will be posted at the roadside.

Who Should Attend: contractors, builders, project managers, engineers, developers, public works personnel, and those involved with land disturbing activities.

Cost: No charge

Morning Agenda:

- 8:30 AM to 9:00 AM-Registration
- 9:00 AM to 12:00 PM -Basic elements of sediment control and stormwater management on typical construction sites.
 1. Vegetation selection, establishment and maintenance
 2. Common controls used on construction sites: Silt fences/sediment barriers, Sediment basins, Retention Basins, Rock check dams, Limits of disturbance, Inlet controls, Slope/Ditch protection, Matting, Slope drains, and Level Spreaders, etc
 3. Sediment and other pollutants exposed on construction sites. Why be concerned?

Lunch: On your own at one of the many nearby restaurants.

Afternoon Agenda:

- 1:00 PM-1:30 PM-Registration
- 1:30 PM to 3:30 PM-Field demonstration of installation of basic controls (location to be determined). Note, you do not have to attend the morning workshop to attend the afternoon session. Topics will include demonstration of proper silt fence installation, slope matting, and hydro seeding.

Presenters:

- Pearce Atkins, PE, Stormwater Director, Sumter Soil and Water Conservation District (SWCD)
- Bobby McGee, Resource Conservationist, USDA Natural Resources Conservation Service (NRCS)
- Peter Wilson, PhD, PE, Sumter County Engineer
